

**Indian Centre for Plastics
in the Environment (ICPE)
is hosting the
International Conference
on Plastics & Sustainability
on**

3 FEB 2023

at The Lalit, Connaught Place,
New Delhi.

Supported by

PLASTINDIA FOUNDATION[®]

ISO 9001-2015 certified

Climate change caused by global warming has brought “**Sustainability**” at the center stage. Plastic products paradoxically play a positive role, and these have relatively lower environmental footprints. ICPE is hosting the Conference to address these issues.

Keynote Address & Panel Discussions shall cover

- **Plastics Recycling Technologies**
- **Biodegradable/Biocompostable Polymers**
- **Waste Management Solutions**
- **Policy & Regulatory Issues**

International Conference on Plastics & Sustainability

Background of the Conference

The theme of the conference is “Plastics & Sustainability”. Environmental impact of many inventions of human race were far reaching to such an extent that it has become a concern to the very existence of the civilization. Global warming has brought in the climate change threatening the very existence of the world. Urgent response to achieve the globally identified SDGs is required. Ensuring sustainability is now recognized as one of the most important considerations in all human activities.

Countries world over have started acting in this regard by developing technologies for scientific recycling and recovery of plastics waste. India, the 3rd largest plastics consumer country in the world, has reached the status of recycling ~ 60% of the plastics waste it generates. Government authorities have introduced mandatory EPR regulations for reaching 100% recycling status by 2025. Towards achieving this goal, Indian Centre for Plastics in the Environment (ICPE) is hosting an “International Conference on Plastics & Sustainability” on 3rd February 2023 at New Delhi, during the forthcoming “PLASTINDIA 2023 EXHIBITION”, to address these issues. World's best technology providers in plastics waste management systems, including pre-recycling stages like collection, sorting, cleaning, and processing, will share their experiences during the event. Internationally distinguished scientists and academicians and industrial experts will discuss the role and scope of alternate materials like biodegradable and compostable plastics in this regard.

Broad outline of the conference

A global and insightful perspective on the theme in the inaugural session from international institutes and Keynote Address by National Regulators / Policy Makers will set the context for subsequent deliberations on this important topic. This conference will bring immense benefit to participants by interacting with experts of National and International repute.

International Conference on Plastics & Sustainability

Inaugural Session

Focus on Sustainability and Circular Economy. Inaugural Address from Government Authorities, Keynote Speakers from Industry / Consultancy / Academia

Technical Session -1 (Recycling Technology)

Industry speakers - Material Technology, Processing Technology / Chemical Recycling

Technical Session 2 (Alternative Material Technology)

Biodegradable _ Compostable Plastics; Additive Manufacturers / Academic Panelists (Industry / Regulators / Brand owners)

Session 3 - Plastics Waste Management

Industry speakers. Panelist - Start-ups, Digital Platform Developers, Local Authorities

Sponsorship

Sponsorship Categories & Benefits				
Categories	Amount (Rs.)	Free Delegates	Pre-Function Area Table Space	Full Page Ad in Conference Proceedings
Platinum	6,00,000	6	Yes	Yes
Gold	4,00,000	4	Yes	Yes
Silver	2,50,000	2	Yes	Yes
Lunch	1,50,000	1	Yes	Yes

International Conference on Plastics & Sustainability

About Indian Centre for Plastics in the Environment (ICPE)

The Indian Centre for Plastics in the Environment (ICPE) was set up on 27th January 1999 on the recommendation of a Task Force constituted by The Ministry of Environment, Forests and Climate Change (MOEF & CC), Government of India, with an objective to handle Environmental, Social and Technical issues related to plastics and the associated industries. The Center was founded by Chemicals & Petrochemicals Manufacturers' Association (CPMA), an apex body representing the Chemical & Petrochemical producers / Plastics Resin Manufacturers and Plastindia Foundation (PIF), the apex body of Plastics Processing Industry, Plastics Machinery Manufacturers, and the Allied Industry. This is a non-partisan voluntary effort of the plastics industry. This is a not for profit and non-partisan voluntary organisation having the Charter to help promote and sustain an environment friendly initiative by highlighting the positive role of plastics in conserving resources, promote responsible use, recycling and scientific management of plastic waste.
